

# When to Consider Field Delivery:

- **Obviously it is best to transport an expecting mother prior but, ...**
  - **When delivery can be expected within a few minutes**
  - **When a natural disaster or other catastrophe makes it impossible to reach hospital**
  - **When no transportation is available**

# APGAR Scoring

APGAR	0	1	2
<b>Appearance</b>	Blue	Pink Central Blue Extrem	Normal
<b>Pulse</b>	<60	60 – 100	>100
<b>Grimace</b>	None	Weak Cry	Sneeze, Cough, Pull Away
<b>Activity</b>	None	Flexion	Active
<b>Respirations</b>	None	Weak	Strong

**<3  
Critical**

**4-6 Low**

6

**7-10  
Normal**

# Abnormal or Complicated Delivery Emergencies

- **Fetal demise**

- Very emotional situation for family and providers
- The infant may be born with skin blisters, skin sloughing, and dark discoloration.
- Do not attempt to resuscitate an obviously dead infant.
